# INTRODUCTION

---

MSN Token is bringing a revolution with its crypto based products by developing borderless financial services that ensure a faster, simpler, and uninterrupted flow of capital.

MSN Token is built with an aim to provide a user-friendly experience where users can access a wide range of financial products and services backed by industry leading security processes and insurance protection.

It is open-source with consensus achieved using proof of stake. It has been launched with a strong focus on Exchangers and scalability, and it enables complete privacy. MSN Token has a substantial Ecosystem around which includes Launchpad, Swap Exchange, Defi Ecosystem, NFT Marketplace, Game fi, Exchange, and many other components to make the MSN Token Network more efficient. So, Unique Coin is the most important part of the MSN Token ecosystem.

# CRYPTO CURRENCY EXCHANGE

---

## Centralized Exchange

A centralized exchange is a widely accepted platform to trade cryptocurrencies. To be centralized means the presence of a middleman to handle the assets to be traded. It is akin to a bank in a way that it involves a middleman to hold people's funds. Just like banks hold their customers' money on their behalf, centralized cryptocurrency exchanges hold their traders' crypto assets for them. It means that the traders do not have complete control over their funds and they have to rely on the middleman for any kind of transaction.

## Decentralized Exchange

A decentralized exchange, also known as a DEX, is a peer-to-peer (P2P) online platform that enables direct cryptocurrency transactions between the parties. It aims to address the problems of the centralized exchange – such as the involvement of a middleman. This is achieved by the creation of a P2P market directly on the blockchain, which allows traders to independently store, access, and transfer funds.

# ABOUT US

---

MSN Coin initially run on the BSC Blockchain with BEP-20 standard. Binance Smart Chain is a recent development that benefits its users with a rich and growing digital asset ecosystem like never seen before in the decentralized Exchange spectrum MSN Coin is the cryptocurrency issued by Binance Smart Chain and trades with the BNB coin. Binance Smart Chain is an independent blockchain that runs in tandem with the Binance Chain. MSN Coin dislikes inflation so we created a system that can fight it. Many people in the world have been affected by inflation and we aim to create an ecosystem that saves people from the negative effect of holding FIAT currency and being under the central bank's control.

# HOW IT WORKS

---

We work tirelessly to ensure every excruciating detail is refined to perfection.

Our experienced graphic design team works day and night to bring all our ideas to life and to build one of a kind gaming experience.

The number one priority of Project MSN Coin will always be to carefully listen to the wishes of our community and to deliver a product that will make every investor proud.

Everyone who loves profits, that's why MSN Coin tokenomics have been Specifically Engineered to bring profits to your Wallet in more than one way. The Reward feature automatically brings additional Tokens to your Wallet whilst you sit back and Relax. The Marketing Wallet ensures steady growth. And finally the Auto Liquidity feature brings Stability to the Price Floor. Don't just read here, click on the links below and join us!

# MISSION

---

- ❑ To try on unlocking MSN Coin potential and making MSN Coin easy to use.
- ❑ To make MSN Coin market place with global reach.
- ❑ To provide attention to the financial profits and safety of every single stakeholder.
- ❑ To facilitate the ability of buyer-seller to transact a wallet in the most secure way.

# VISION

---

- ❑ To create a global MSN Coin marketplace where buyers and sellers can buy, sell and trade MSN Coin in most secured and trusted manner.
- ❑ To solve current problems of customers in a manner that make their business easier.

# WORKING WITH BINANCE SMART CHAIN

□ ————— □

Binance is founded on a few essential concepts, the most important of which is decentralization. All data on the Blockchain is completely unfettered and is not under the jurisdiction of a central authority. Content creators can receive Binance in return for sharing their work. Additionally, developers can create their own coins on the Binance network. These tokens can then be used in the network's user-created decentralized apps (dApps). Binance main token is used to back the newly issued tokens. The network's ultimate step of development is to support Binance -based games. These games would be totally decentralized, with users rewarding authors directly if they enjoyed the game. Binance's consensus algorithm is referred to as delegated proof- of-stake. In this system, transactions are authenticated by 27 super representatives who are responsible for keeping the transaction history. Super representatives are picked every six hours and compensated with a Binance coin created by the system. Every three seconds, a new block is added to the Binance Blockchain.

# BENEFITS OF BINANCE SMART CHAIN

Transactions on the Binance Blockchain technology at Very Less Cost. Binance does not impose a fee for asset transfers. It assists sellers and buyers through its free transactions, promotes, and provides the optimal business environment. Rapid transactions The network can handle up to 2000 transactions per second. Scalability and the potential to revolutionize online media are encouraged by such transactional capacity. This is a major accomplishment compared to Ethereum (25 transactions) or Bitcoin (3-6 transactions). Creates dApps On the network, you can create dApps. You can earn digital assets by creating a dApp on the network and offering content on it. These can be in regular Binance you created Binance backs that. As a result, you may be compensated for your efforts in developing the app and its content. If you don't want to create your own dApps, you can still browse through the vast collection already created.

# DECENTRALIZED

---

DeFi is a collective term for financial products and services that are accessible to anyone who can use Ethereum – anyone with an internet connection. With DeFi, the markets are always open and there are no centralized authorities who can block payments or deny you access to anything. Services that were previously slow and at risk of human error are automatic and safer now that they're handled by code that anyone can inspect and scrutinize.

- A global, open alternative to the current financial system.
- Products that let you borrow, save, invest, trade, and more.
- Based on open-source technology that anyone can program with.

# BENEFITS OF BINANCE SMART CHAIN

## Zero Human Factor;-

The human factor is not taken into consideration. The smart contract is not dependent on anyone, and there is no way to prevent the platform from functioning.

## Decentralization ;-

Instead of having managers or administrators in charge, there are only creators who are members of the community on the platform, just like everyone else.

# TOKINOMICS

Name: MSN Coin

Maximum Supply: 100,0000,000

Network: BSC Scan

Contract - :

11 <sup>th</sup> I.T.O.	1.5 cr Token	\$2 Price	2 To 4 Months

# PROOF OF STAKE

Seeing as cryptocurrencies are decentralized and not controlled by banks, they require a way to verify transactions. Proof of stake is a popular method (PoS). Proof of stake is a consensus mechanism for cryptocurrencies. By staking their coins, cryptocurrency owners can check new transactions and add them to the Blockchain. This method replaces proof of work, the first cryptocurrency consensus mechanism. Proof of stake has grown in popularity as concerns about the environmental impact of crypto mining have grown. Proof of stake is critical for cryptocurrency investors. These are some examples of cryptocurrencies that use it. Owners of a cryptocurrency can stake coins and create their own validator nodes using the proof-of-stake model. Staking is the act of pledging your coins to be used for transaction verification. They are locked while you stake your coins, but you can unstack them if you want to trade them. When a block of transactions is ready to be processed, the proof-of-stake protocol for the cryptocurrency selects a validator node to review the block. The validator verifies the accuracy of the block's transactions. If this is the case, they add the block to the Blockchain and receive cryptocurrency as a reward for their efforts. If a validator proposes adding a block with incorrect information, they will be penalized by losing some of their staked holdings

# ROADMAP

Q1 2023

- ◆ Logo and Brand Design
- ◆ BEP-20 contract Development
- ◆ Audit
- ◆ KYC
- ◆ MSN Twitter page
- ◆ MSN Telegram Channel
- ◆ MSN Facebook Page
- ◆ Presale
- ◆ Decentralized Wallet

Q2 2023

- ◆ Coingecko Listing
- ◆ Coinmarketcap Listing
- ◆ Community
- ◆ Airdrop Dstributon
- ◆ Listing on Pancakeswap
- ◆ Marketing Campaign

Q3 2023

- ◆ Strategic Partnership
- ◆ Community Pools
- ◆ Marketing Progress
- ◆ MSN Coin DEX launching (like Pancakeswap/uni swap)

Q4 2023

- ◆ Dex NFT Launching
- ◆ Liquidity Locker
- ◆ Social Media Press
- ◆ CEX Listing

Q1 2024

- ◆ Centralized Exchange UI/UX Design
- ◆ Decentralized Exchange UI/UX Design
- ◆ Governance Functionality Pools

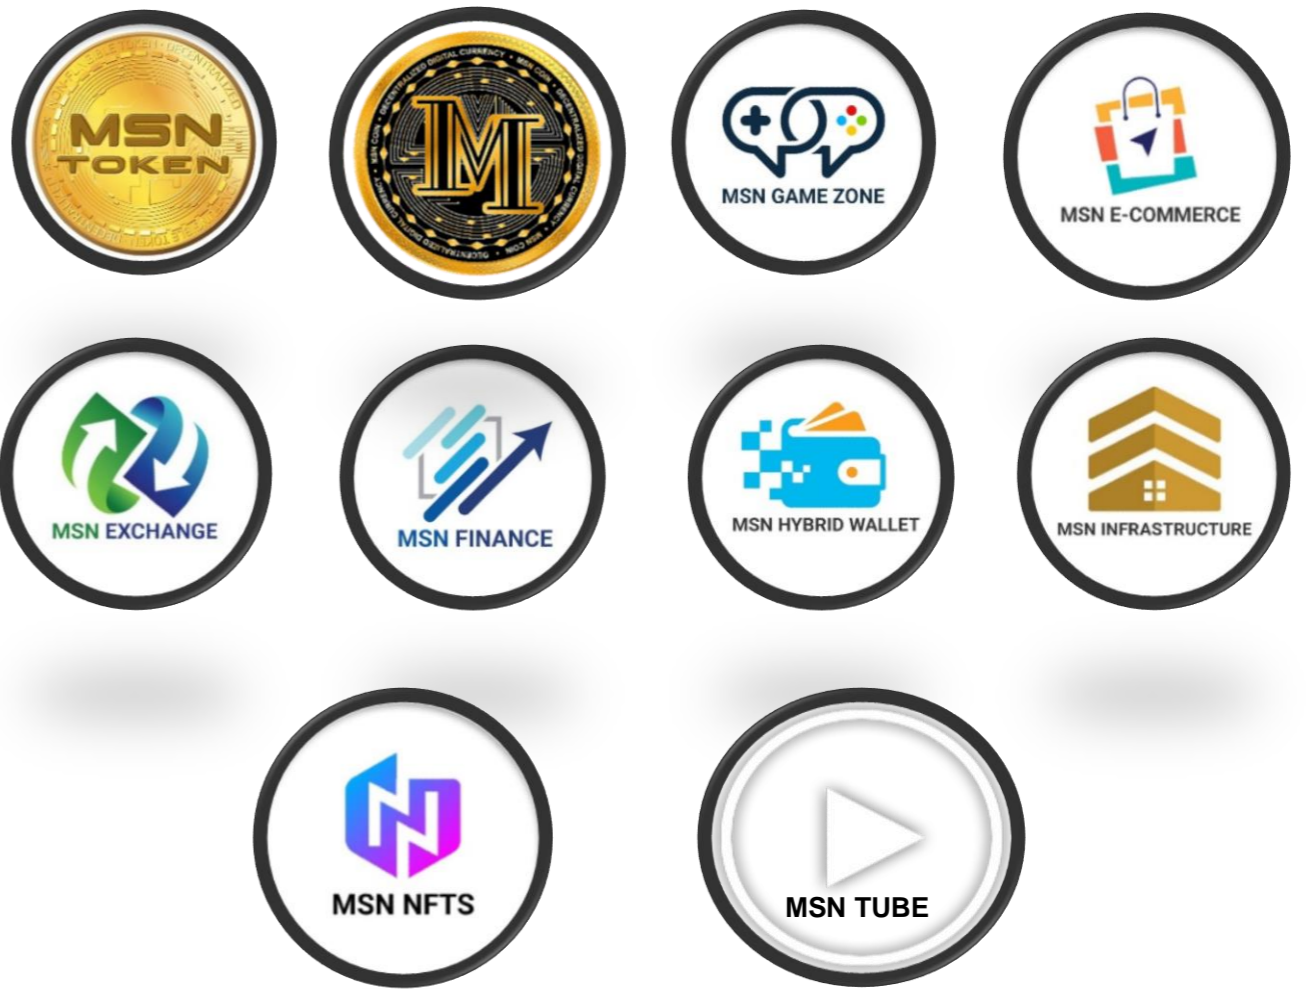

# OUR TEAM

The safety issue is very crucial in every field and can affect the condition of a business and its performance. The companies need to take steps to ensure safety around their files and the account of the employees working with important clients. To make sure that everyone gets the best services for getting safety in their work environment and personal level, MSN Coin is planning on hiring professional people who know everything related to the safety concerns that might arise in the business world. With the help of professional people, users can get the solution to their problems very easily and do not have to worry about their data. The data includes the work that has been done by the company or the employees which contains the details of the clients. It can be misused if it gets in the wrong hands which affects the reputation of the company.
